

ANTI-VIBRATION MOUNTS FOR HARSH INDUSTRIAL ENVIRONMENTS

capacities 5kg - 300kg

Ideal for applications with mixing, agitation and vibration, this stainless steel assembly is designed to reduce the vibration transmitted to the load cell. It is typically used in weighing platforms, big bag (FIBC) filling systems, belt weighers and hopper/tank weighing in the Food Processing, Chemical, Pharmaceutical and Bulk Handling industries.

The stainless steel, OIML C3 or C6 approved, model T66 load cell used in this anti-vibration weighing assembly is fully welded and hermetically sealed for protection to IP68 and IP69K, allowing it to be used in extremely harsh environments with exceptional accuracy. The assembly consists of a load cell, mounting hardware, baseplate and spacer (all stainless steel) with an elastomeric anti-vibration pad.

ATEX certification, for both gas and dust zones, is available for the T66 load cell. To reduce costs, certification for use in dust zones 20, 21 and 22 without safety barriers is available.

For applications in aggressive environments where stress corrosion or acid attack is an issue, a special Parylene coating for the load cell can be specified as an option. Other options are custom load cell cable lengths for volume OEM customers and a version for high temperature use.

- Stainless steel load sensor & mounting accessory
- Hermetically sealed, fully welded construction
- Simple, fast installation
- Sealed to IP68 / IP69K
- 3000 divisions OIML R60 Class C (C3)
- 5 year warranty
- High Integrity cable entry
- 6 wire cable (with sense wires) as standard
- High durability Polyurethane load cell cable
- Options of  approval, OIML C6 approval, Parylene coating or High Temperature use

6 Wire Connection (C3 or C6)

4 Wire Connection (C3 only) – on request

Electrical Connections

Via 6 wire, 5.7mm diameter, screened Polyurethane cable. 4 wire version is available on request (for OIML C3 version only). Screen not connected electrically to load cell.

Construction

T66 load cell, baseplate and mounting hardware: stainless steel
Anti-vibration pad: elastomer (rubber)
