

S-TYPE STAINLESS STEEL LOAD CELL FOR COMMERCIAL WEIGHING

capacities 250kg - 7500kg

Upper and lower rod end bearings are optional items

The T68 stainless steel S-type tension load cell is ideal for 'commercial' weighing, due to its approval to OIML R60 3000 divisions (C3). Its fully welded and hermetically sealed construction ensures total environmental protection to IP68 / IP69K, coupled with excellent long term signal stability and performance. Additionally, it is supplied with a high durability polyurethane cable and the option of rod end bearings, making it the ideal S-type load cell.

The T68 load cell is available with optional ATEX certification for all Gas and Dust zones. The ATEX certification for dust zones 20, 21 and 22 does not require safety barriers, which saves substantial cost.

An optional high temperature variant for continuous operation in environments up to 150 °C is also available. For applications in aggressive environments where stress corrosion or acid attack is a potential problem, a special Parylene coating can be specified as an option

- Stainless steel load sensor
- 2 mV/V rationalised output
- Fully welded and hermetically sealed to IP68 / IP69K
- 5 year warranty
- Suitable for use in tension, compression or a bi-directional manner
- Optional rod end bearings available
- Excellent long term stability
- Approved to 3000 divisions (C3) OIML R60 Class C
- High durability Polyurethane cable
- Optional  and high temperature versions
